CONCEALED CISTERN FEATURES

HYGIENIC

By offering assembly solutions that are concealed in the wall EUROSYS concealed cistern enables easy cleaning without the clutter of visible connection pipe or intermediary hoses. The height gained by using wall-hung WC pan creates an empty space under the pan, making it very easy to clean.

QUIET

Thanks to the special filling group used inside, the concealed cistern works quietly. The Styrofoam cost provides extra insulation.

SAVES SPACE

As the cistern is concealed behind the wall and under the plaster work, you save precious space, resulting in a wider bathroom. With concealed in-wall installation solutions, space is saved and more living space is provided.

SAVES WATER

WC pan-cistern systems prevent unnecessary water consumption with their special bowl structures and concealed cistern float valves that ensure low water consumption. With its two-stage flush function, the concealed cistern results in water savings of up to 70% in the 2.5/4L and 3/6L options.

ABOUT US

We are producing widest range of toilet seat cover with slow down mechanism and regular seat cover.

For the flushing part, having dual mechanism flush tank, one piece tank fitting

Producing Concealed Tanks for exclusive and elegance homes.
